SCRUB TYPHUS (RANNUNG SEH) NATNA BIHCHIANKA

Rannung seh natna kan tihamai, *Scrub typhus* hi *Orientia tsutsugamushi* natna hrik in mihringa natna a thlen hi ani. *Tsutsuga* awmzia chu hlauhawm tihna a ni a, *mushi* tih chu Tuhrik (mites) tihna a ni a, Tuhrik (Trombiculid mites) te hian Transovarial (a puiin a note ah) leh transtadial (a note in a pui anih thleng an inhlanchhawng) transmission in heng natna hrik hi an keng kual thin a ni. *Scrub typhus* hi kum 1899 khan Japan ramah chiang taka hriatchhuah hmasakber ani. A hming *Scrub typhus* tih hi he natna lo awm tan duhna hmuna hnime hming **Shrub** (hnim lianlo) atanga phuahchhuah ani. He natna hi kumtin mi maktaduah khat velin an vei thin a, a veite hi enkawlna mumal pek an nihloh chuan za a sawmthum velin an thihpui thin a ni. He natna hi Tuhrik *Scrub typhus* natna hrik pai in mi a seh atanga ni 10-12 chhungin a langchhuak thin ani.

Rannung seh natna (*Scrub typhus*) thehdar anih dan

Scrub typhus natna hrikte hian inthlahpun nan leh thanlen nan(reservoir),sazu lam chiho(rodents) te hi an hmang a, heng sazute atang hian tuhrik in natna hrik chu lachhawngin mihringah an thehdar ta thin ani.Tuhrikte hi an te hle a, chi (species) tam tak phei chu mit lawng in an hmuh theihlo a ni. India rama he natna thehdarhtu tuhrik (vector) chu *Leptotrombidium deliense* ani a, Japan leh khawchhak lam ramah te chuan *Leptotrombidium akamushi* in a thehdar thung ani. Tuhrik sehna ah khan hmuam hma(eschar) pankhir alo awm thin a, he natna hmuhchuah nan a tangkai hle a mahse heihi 40-50% ah chauh a awm thin ani. Mite (Tuhrikte) hian an damchhung hian pianhmang leh nihphung danglamna (life cycle) chhawng li an kal tlang thin a ,chungte chu, Egg, Larva, Nymph leh Adult te an ni. Larva an nihlai chauh hian he natna hi an thehdar thei a ni.

Natna awm duhna hmun te

Khawvel hmun thenkhat ah chuan he *Scrub typhus* natna hi engtiklai pawhin a awm reng a, heng hmunte hi “**Tsutsugamushi Triangle**” an vuah a ni a, India ram pawh hi a telve ani. *Scrub typhus* natna lanchhuahna leh awmduhna hmunte chu:-

1. Mites (Tuhrik) awm duhna hmun , rambua leh dai hnime hmunte.
2. He natna hi hmumbik huam zau vak lo ah a thleng thin.
3. He natna do letna neilo an tamna hmun ah.
4. Hun kal tawh a rannung seh tawk ngai lo te ah a thleng duh bik bawk.

Rannung seh natna dinhmun

India ramah hian, he natna hi natna lo awmtawh thin, lo lang nawn leh re-emerging disease anga ngaih a ni. He natna tamna hmun te chu, Sub Himalayan Belt, Jammu atanga Nagaland te, Himachal Pradesh, Sikkim leh Darjeeling ah te a ni. India chhimlam ah chuan he natna hi khaw vawh laiin a thleng deuh ber a ni. He natna hi sik leh sa in a hril thui em em a, Tuhrik lam chi te an inthlahpun chak dan in a hril thui hle bawk a ni. Dan naran in he natna hi Furah leh favangah ah a lang chhuak tam ber a ni. Heng Ramngaw thiah darh na hmunte, luikam te, phulhmun te hi Tuhrik te tana inthlah punna hmunte ber a ni. India ram hmun hrang hrangah hian he natna hian pun lam a pan zel a, buaipui tham ani. Mizoramah hian engtik lai tangin nge he natna hi alo awm tawh hriatchian fak a ni lova, amaherawhchu Mautam hun lai atang khan he natna hi a hluar vak ani tih erawh chu a hriat theih thung ani. Health Department hnuai a, IDSP te chuan kum 2012 atang khan District hospital te leh private hospital thenkhat atangin he natna data hi a lakhawm tan a,tun thleng hian mi 1501 vei awm tawhin mi 37 in an thihpui tawh bawk ani. Private clinics leh private hospital thenkhat te atanga data hi lakkhawm theih

Scrub Typhus

Etiology, Epidemiology
Signs and Symptoms
Pathogenesis, Diagnosis
and Treatment

a nih loh avangin a vei zat leh thi zat hi hei ai a tam viau tura ngaih a ni bawk a ni. Malaria tih loh ah chuan rannung atanga kai natna (vector borne diseases) zingah Mizoramah buaipuiawm ber ani tawh a ni. 30.09% lai hi Aizawl khawchhung a mi an ni.

A natna lanchhuah dan

Tuhrik seh hi ana lem lova, thak ang in a rawn lang chhuak a, vun nemlai zak hnuai ah te, kapkarah te, dulah te leh nghawng ah te a seh duh bik a ni. Tlun/ khurh leh khawsik, nasa taka luna, mit vel sen rem rum, thal thoh leh hnungzang vela thak bawl angte in he natna hi a rawn lang chhuak thin a ni. A chang chuan tihrawl leh pumate pawh a thlen bawk a, a nasat phei chuan thisenzam chat te leh thisenzam block te a thlen thei a, Pneumonia leh thawkna lama harsatna te pawh a thlen thei bawk a ni. *Scrub Typhus* natna hi thisen ekzam atangin a hmuh chhuah theih a, Mizoramah hian, Rapid Diagnostic Kits (ICT) te hi he natna hriat chhuah nana an hman ber a ni a, WHO leh Health Ministry lam chuan ELISA hmanga test hi an recommend thung ani.

Enkawlna lam

Scrub typhus natna hi Antibiotic damdawi hmanga enkawlna ni a,damdawi an hman lar tak chu Doxycycline a ni a,Chloramphenicol pawh an hmang bawk a ni a, Naupang leh Nu naupai lai ah chuan Azithromycin pektur a ni. He natna hi a invenna (vaccine) a la awm hrih lo a ni. Heng damdawi kan han tarlan tak te hi mahni thu a lo ei ve mai hi a him lova, Doctor te rawn phawt hi a thaber leh himber a ni.

Inven dan tur

He natna awm thinna leh a thehdarhtu tuhrik awmduhna hmunte ah te chuan thawmhaw hak uluk a ngai em em a,thawmhaw taksa khuh tam thei ang ber hak tur ani. Rannung duhloh (insect repellant) damdawi, Odomos, Permethrin, Dibutylphthalate, te leh adang te thawmhaw ah leh taksa lang lai ah te ram chhuah dawnin in chulh tur a ni a, Hnim ah te leh phul ah te engmah phahlo in that mai mai loh tur a ni. In leh a vel fai tako vawn reng hian nasa takin min veng thei bawk a ni. Rannung thahna hlo(Insecticides) kah a tangkai hle bawk ani.
