He hrileng hi inbuatsaihna tha tak nena kan lo hmachhawnchuankhawvel puma darh lovin a la Control theih hi mithiam ten an la beisei a ni. ■

JAPANESE ENCEPHALITIS

*Dr. Hmingthanmawii
Jt. Director (Malaria)
Directorate of Health Services
MINECO, Aizawl, Mizoram*

JAPANESE ENCEPHALITIS hi viral disease a ni a. He natna thlentu hi thosi chi khat Culex seh atangin mihring in kan kai a ni. He natna thlentu hi kan ranvulhah te inthlah pungin thosi hian a pu darh thin a ni.

A natna lanchhuah dan:

JE natna hi a hri pai thosi in min seh atangin ni 5-15 chhung in a natna hi mihringah a lang chhuak thin a. A natna lanchhuah dan tlangpuiah chuan khawsik, kawthalo, luakchhuak te a ni a. A na zualah chuan heng kaihte, chauh ngawih ngaihna, vai ruai, zeng, nikhaw hrelo leh thihna thlengin a thlen thei a ni.

JE natna hmuhchhuah dan:

JE natna hi a clinical symptoms (natna lanchhuah dan) leh Laboratory test hmangin hmuhchhuah (diagnose) theih a ni. Amaherawhchu, confirmatory diagnosis atan chuan Laboratory test chia h man a ni. JE hmuhchhuahna atana India a kan laboratory test hman mek techu: ELISA hmanga Thisen/CSF

(cerebrospinal fluid) test te, PCR test te etc.

Tunah hian Mizoram sawkar in Zoram Medical college ah a hma thei ang ber a JE test thei tur hian theihtawp a chhuah mek ani.

JE natna enkawl dan:

JE natna hi a hrana enkawl dan bik leh a damdawi bik a awm lova, chuvangin a natna lanchhuah dan azir zel a in enkawl tur a ni.

JE natna hi kum naupang lam, kum 12-14 hnua lamah hian a serious bik thin em avangin fimkhur leh zual a ngai em em ani.

A thlentu thosi:

He natna thlentu thosi chi khat Culex tritaeniorhynchus, Culex vishnui leh Culex

pseudovishnui group-seh atanga mihring in kan kai a ni. Heng thosi te hi in leh a vel a tui thin an ni a. Thosi lo puitlin dawn hian thanchhoh dan chi-4 heng, a tui (egg)-a no te (larvae)-buhchium (pupa)-puitling (adult) a kal tlang a ngai a. Egg, larvae leh pupa te hi tuiah an awm thin a, an awm thinna tui tling pahi fai zel chuan tih rem dan tha tak a ni. A nu puitling (female mosquito) hi kar 4-6 vel an dam tlangpui a, hemi chhung hian vawi 4-5 vel a tui a, vawi khat ah 100-150 vel an tui tlangpui a, hetiang a nih avang hian thosi nu pakhat hian a dam chhungin tui 400-750 vel a nei thei tihsa a ni a, Puitling vek sela chuan thosi hi tam tur an lo ni reng a ni.

Culex those te hi thimhlim (dawn) thosi an ni tlangpui a. Tui chhe tlingah pawh an in thlahpung thei a, phai leh hmun zawl engtiklai pawh a tui tlinna leh tui bal tak takah te pawh an awm thei. He natna thlen tu thosi (Culex sps.) hi Mizoramah pawh tam tak an awm ve a, hetiang vei kan la awm ve vak loh avangin thosi atanga kan

inkaichhawn tur lakah pawh kan la hram hram chu a ni e. Hetiang thosi hi thimhlim leh zingkarah mi an zuk (suck) tlangpui a, thimhlim thosi ngalsang kan tih ang chi ho kha an ni.

JE natna mihring a a thlen theih dan:

JE virus hi kan ran vulh (a bik in vawk) leh aquatic birds (tui bul sava) ah te hian natna langchhuak si loin an awm thin a. Vawk hi amplifier host (virus intlahppunna) an nih avangin, mahni In/chenna bula leh a vela vulh loh a pawimawh em em a ni.

JE virus te hi Malaria ang lo takin mihring leh mihringah a intlahpung ve lo a, JE natna vei thosi in a seh in, kha thosi vek khan mihring dang a seh in, JE natna hi a thehdarh ve lo a ni. Hemi a nih avang hian mihring chenna bulhnaia JE natna intlahpun theihna vawk te hi vulh loh a him ber.

Invenna:

JE natna hi enkawlna bik damdawi a awm loh avangin inven a pawimawh hle a. A

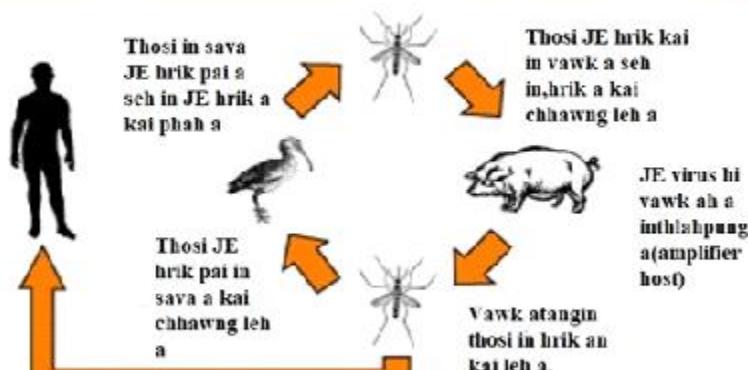

natna thlentu thosi seh laka inven a pawimawh hle a ni. He natna thlentu thosi te hi in leh a velah an tui tlangpui a, chuvang chuan thosi pian theihna tuitling tihbo a pawimawh hle a, tuizem leh barrel-te thosi tui theih lohna tur atan chin tha tak a phui takachin thin tur a ni. Thosi seh laka invennan thosilen zar that te, thosi hnawh bona heng Good knight, tortoise leh a chulh chi odemos hman te hian thosi seh lakah min veng thei a ni. JE thlentu natna hrik (virus) te hi kan ranvulhah te a awm thin avangin ran vulh thin

te phei chu kan fimkhur zual a ngai hle a. He natna (virus) thlentu leh pu darhtu thosi tih rem leh a seh tur laka inven that hi a pawimawh em em a ni.

Vaccine:

JE vaccine SA 14-14-2 hi kum 2006-ah khan India ram sawrkar in JE darhna (outbreak) hmunah hman turin Universal Immunization Programme(UIP) hnuiah dah a ni tawh a ni.

JE hrik mihringlu kan kai theih dan

Thosi JE hrik pai in mihring a seh in JE natna a thlen thin aai. Amaherawhchu, mihring atangin JE hrik hi a darh ve thei tawhlo

DRAGON FRUIT (*Hylocereus undatus*) Family: Cactaceae

Dr. Lalkhawngaihsanga

Dragon fruit hi thei hrisel tak a ni a, South America atanga lo chhuak hmasaa hriat a ni a. Mizoramah pawh dragon fruit chin kan intihmuh a, kan ram boruak pawh hian a ngeih ve viau ni tur a ni. A ei thei tan chuan thei hrisel lutuk a ni.

Dragon fruit hian taksa mamawh phytonutrients, vitamins leh minerals a pai tam hle mai a. Dragon fruit hian taksa mamawh vitamins leh minerals tlem te tein a pai k im hle a.

Dragon fruit hian antioxidants - Betalains, hydroxycinnamates, flavonoids etc, a pai a, vitamin C, polyunsaturated fatty acids, carotene leh protein a paitam a. Vun tan a tha hle a, vun a tilang naupang thei a, min titar har thei bawk.

Dragon fruit hi arngeng tan pawh a tha a, vun a tihnawng tha thei a, ni zung atanga vun natna, sunburn a tiziaawm thei. Tin, sam a tihrisel thei a. Ruh leh ha hriselna atan dragon fruit a tha a.

Taksa cholesterol awm zat a tihniam thei a. Dragon fruit hian dietary fiber a pai tam a, pumpui leh ril hriselna atan a tha a. Thisena thlum awm zat, blood sugar level a vawng dik thei a, lung hriselna atan a tha a. Dragon fruit hian ruhchuktuah na leh vung a tiziaawm thei a. Taksaanatna do lettu khawl, immune system a tichak thei a. Dragon fruit hian taksa venghimtu a pai tam a, natna hrik do let theihna a nei bawk a. Cancer timur insiam tur a veng theia hriat a ni a.

Dragon fruit hian iron a pai tam a, folic acid a pai bawk a. Naupai tan dragon fruit a tha a, taksaan cell siam chhuah a pui thei a. Mittan a tha a, chaw ei a titui thei a, thluak

hnathawh a tichak thei bawk . Dragon fruit chhunga a var lai hi lak chhuah a, yoghurt, dhoi tlem telh a, face pack anga hmaia hnawih tur a ni a. Minute 20 vel hnuah tui lum pip pepa hmai phihfai leh tur a ni.

Dragon fruit var lai lak chhuah a, lu vun leh sama hnawih a, minute 20 vel hnuah

suk fai leh tur a ni. Dragon fruit hi huat (allergies) a awm ve thei a, ei tam lutuk chuan vun thak leh bawl a awm thei a. Thlum, sugar leh carbohydrates a pai tam lo va. Tarlan fo tawh angin, zunthlum natna nei tan erawh, vawi khatah dragon fruit ei teuh loh tur a ni.

HMANGCHANG

- § Dal hi siam hmain tuia chiah lawk a tha, a hmin hma duh.

NATNA TLANGLAWN TE (ENKAWL DAN)

1. Hritlang naran (Common Cold) :

- * Chawl hahdam.
- * Tuilum thianghlim tam tawk in tir tur.
- * Hnar emaw kain emaw tui (sa) hu - hip luhtir tur.
- * Lu na te, taksa na leh khawsikte a awm chuan na chhawkna aspirin, paracetamol eitir tur.
- * Mi dangin an kaichhawn ve loh nan khuh in ka hup nan rawmawl hmantur.

2. Khawsik (Fever):

- * Naupang a nih chuan, a kawr hak lai tawt leh a phuartu chu phelh, thlaksak vek tur.
- * Taksa, hmai leh chalte chu tuilum pip pepah puan tih huhin hruk tur.
- * Dam lo chu tui vawt tam tawk, chini tlem leh chi tlem tuiah pawlh a intirtur.
- * Akhawsik tihhniam nan aspirin, paracetamol pek tur.

3. Lu na (Headache):

- * Mut hahchawlhтирла;
- * Na chhawkna aspirin, paracetamol pek tur.
- * Balm emaw na chhawkna a chalah hnawiha nuai tur, mitah tih luh loh tur a ni.

4. Hnung kham (Backache):

- * Chawl hahdam.
- * Na chhawkna aspirin, paracetamol pek tur.
- * A nalaiah chuan damdawi, nachhawkna chi hnawiha nuai tur.
- * Ngil tak a that leh din thurawn perawh, mutna pawh a dup tur a ni lo va, mu chungin exercise — hnung kham tana tih theih tur tih tir tur.

5. Ha na (Toothache):

- * Na chhawkna aspirin, paracetamol pek tur

- * Lapua—Olive oil-ah chiah la, ha na kaw hnawh nan hmang rawh.
- * Ha nain a thoh — biang pawn lamah chuan tui lumin dep la,
- * Kum khatah ha daktawr vawi khat tal check tir thin tur.

6. Pum na thut (Acute abdominal pain) :

- * Dam lo chu a nuam thei ang berin muttir la, eitur te, ek nemna chi reng reng pek rih loh tur.
- * Ana lai chhawk nan tuilum ip emaw saidawium a tui sa thunin a na lai chu dep la;
- * Damdawi In lama kalpui vat turin buatsaih rawh.

7. Thawchham (Asthma):

- * Dam lo chu tawng thlamuan rawh.
- * Boruak a mamawh tam avangin dam lo bulah chuan awm khawm loh tur.
- * A thawk harsatna tinuam turin thuttir la,
- * Tui so hu hiptir la; tin, lum intir bawk ang che.
- * Damdawi In-a kal vat thei turin inbuatsaih rawh.
- * Damlo chu a thil ngeih loh/huat tak atangin lak hran tum la, heng hi an thawchham a tih zual theih avangin;

8. Irhfiak (Hiccups) :

- * Damlo chu muttirin chawl hahdamtir rawh.
- * Muang tein tui intir rawh.
- * Dam lo chu thuk taka thawk lain a theih ang chen thaw chhuak lo turin hrilh la. Plastic bag chhungah thawktir rawh. Hei hi carbon dioxide thisenah a tisang a, irhfiak a titawp hlauh thei.
- * Tui no khatah bak ing soda - thirfian te khat telh la, intir rawh.
- * Damlo lei chu chhuahtir la, i kutzungtang pahniha chelhin minute 2 chhung tal lei chu chhuahtir rawh.

9. Ek khal (Constipation) :

- * Glycerine-ek thi nemna mawngkuaah hnawh luh emaw sahbawn tuia mawng lam atanga thuah tir;
- * Anhnah nem ei tam turin hrilh la, tui in tam turin hrilh bawk tur. Tin, exercise tha taka lak bawk tur.

10. Zung tha thei lo (Retention of Urine) :

- * Dam lo chu tui herh haw ri hriat theihna hmunah thuttir la,
- * Apum hnuai lamah tui lum pip pepin dep la,
- * Tui lum chawhtawlha dahin a chhungah thuttir rawh.
- * Mipa anih chuan a serh vel chu tui lumin lehsak rawh.
- * Heng ang zawng zawng itih sak pawha damlo chu ala zung tha thei lo a nih chuan daktawr rawn ang che.

11. Muhil tha thei lo (Insomnia) :

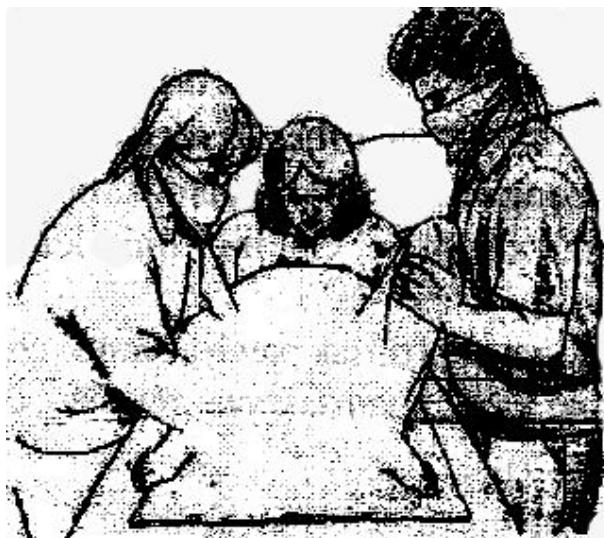

- Chhunah exercise tha tawk la tura hrilh tur.
- Chhunah dam lo chu mu lo tura hrilh tur.
- Zanah mut hmain bawngahnute - chini tlem thlum intir emaw, khawizu tlem eitir tur.
- Mut hmain tui lum sa deuhvin inbuaultir tur.
- Achunga mi ang tih hnu pawha a mut that theih loh chuan dam lo chu dak tawr hnenah inentir rawh se.

12. Emergency Childbirth (Nau chhar dan) :

- Nu naupai, nei mai thei dinhmuna dingin pumna tak leh serh atanga thi emaw, thil dang chhuak a complaint chuan a nau neih a hnai tih hriat a tha. Hetianga a insawisel chuan:
- Hospital-ah kalpui nghal vat tur.
- Nu chu vei lam zawnga saisirin muttir tur.
- A na a chhuah hunah sang mai lo turin hrilh la, a nat lai tak chuan rang taka thaw la turin hrilh la, heihana sang tan mai tur kha a veng dawn nia.
- Thil ei tur sak lam pekloh tur. Thil tuiril chu a pek theih a, mahse zu lampang chi reng reng pek tur a ni lo. Daktawr emaw Midwife a lo thlen hmaa naute chu alo pian hman chuan a piah a thlalak a mi ang hian tih tur a ni.
- Nu serh leh a bul vel chu dettol emaw antiseptic solution neih ang anga hruk fai tur.
- Nu mutna hnuaih chuan puan fai phah la, puan fai a awm loh leh newspaper/chanchinbu hlai leh fai deuh phah rawh.
- Tui chhuang so la, bakcheh emaw blade chhum thianghlim la,

- Nau te chu pawt chhuak suh ang che. Naute lu chu atang deuh a nih pawhin nghak hret la, naute hmaiin a nu malpui khawi lam ve ve pawh a hawi veleh zawi tein i pawt chhuak dawn nia.
- Nau te chu a numalpui karah chuan dah la, a laihruim tur kha ven ngun hle a ngai a ni.
- Nau te ka chu lapaw faiin tihfaisak la
- A laihru chu naute atangin inches khat leh a chanve velah nghet tak in la faiin vawihnih tawn la, suih la itawnna inkarachuan bakcheh/ blade thianghlim fai chuan zai chhum ang che.
- Izai chhumna atanga thisen a lo chhuahchuan hrui dangin tawn tha leh la
- A chhul a lo chhuah hunah a kim leh kim loh en ngun tur a ni.
- A nu pum hnuaiah zutsak la, chu chuan uterus a tifan ang a, thisen chhuak a lo tlem theih nan
- Naute chu puan hulin tuam la • Nu serh chu puan thianghlim in khuh la, pad hmantir tur • Harsatna bik a awm chuan Hospital-ah dah tur.

- Natna inkai loh nan hmai tuam phui tur a ni.

- A ringa hnuk lovin a lu rawn chhuak chu dawmpui tur.

TB PREVENTIVE TREATMENT (Damdawi hmanga TB venna)

Dr. Vanlalfela, State TB Officer
Directorate of Health Services

NATNA inkaichhawn theih zinga natna pawimawh tak tak heng Malaria, Leprosy, Tuberculosis (TB) te hi tihrem (eliminate) theihah ngaiin, kum 2030 - ah khawvel pum huapa tihrem tuma hmalak mek a ni a. India ram chuan chu aia kum 5 hmalam kum 2025 hian Prime Minister rawtna in TB chu tihrem a tum ta a. Chu thil tum tihlawhtling tur chuan kawng hrang hrangin nasa takin tan lak mek a ni a. Heng hmalakna zinga pakhat TB Preventive Treatment (damdawi hmanga venna) chauh hi tun tuma kan sawi tum chu a ni.

TBvenna vaccine hi tha tawk a la awm lova, BCG nausen kan pek thin hian TB na zual (serious form) chauh a veng thei nia ngai a ni a. Puitling leh naupang laka TB venna hman theih awmchhun chu TB damdawi lo ei lawk hi a ni.

TB vei zawng zawngte hian midang an kaichhawng thei vek chuang lo va. Chuap TB vei te chauhin an kaichhawng thei a, chuvangin chuapa TB vei, a hrik hmuh te hi ngaihtuah bik ngai te chu an ni ta a ni. Heng chuapa

TB vei a hrik hmuh (Bacteriologically confirmed pulmonary TB) chenpuite hi damdawi hmanga ven ngai te chu an ni. Tin, HIV pai tawh phawt chuan TB an kai awlsam avangin damdawi hi ei vek tur a ni (TB vei an nih loh chuan).

Chuap TB damlo chenpui zawng zawngte hian a venna damdawi hi ei a ngai lo thei a. Chungte chu TB infection an neih lohin, hei hi Tuberculin Skin Test (TST), IGRA etc. hmangin a test theih a ni. Mahse a

chenpui naupang kum 5 hnuai lam te chu Tubercullin Skin Test kher lovin TB venna damdawi hi pek vek tur an ni thung. Kum 5 chung lamah chuan TB infection nei te chauh kha TB venna damdawi INH (Isoniazid) pek tur an ni a. A test-na a awm remchan loh a, TB symptoms a neih loh bawk chuan INH pek tho tur a ni. Tin, damlo chenpui (contact) te kha TB an vei leh vei loh exam vek tur a ni. TB vei an lo awm hman hlauh chuan TB damdawi enkawl na pangngaea enkawl nghan tur a ni.

TB infection: TB hrikin kan taksa min luh chilh hian natna siam mai lovin hun rei tak pawh a awm thei a. Kan taksa raldo tu te khan natna siam thei lovin an lo dang bet ve thin. Hetih hun lai hi TB Infection (Latent TB) an ti a, a chunga kan sawi test-na hmang khian a hriat theih a. Heng test-na tanga TB infection (TB hrik hmuu) nei techu TB venna damdawi pek ngai kan sawi te chu an ni. Kan taksa raldo tu te an lo chauh hunah TB hrik kan

taksa a awm chuan natna a rawn siam ta thin a, TB vei kan lo ni ta thin a ni.

TB venna damdawi te:

Tun dinhmun, kumin 2022 thleng chuan Isoniazid (INH) chauh hi damdawi hman theih awmchhun ani riha. Naupang leh puitling an taksa rih dan azirin a dose siam sak an ni thin. INH hi nitin thla 6 chhung ei tur a ni. Drug Resistant TB (MDR-TB) venna bik tan Levofloxacin a awm bawk a. Damdawi dang Rifapentine leh INH inkawp hun reilo leh ei dan awlsam zawk pawh a awm thuai tura beisei a ni.

Tunhma chuan TB avanga chhungkuamang thak te sawi tur an awm thin. Thiamna alo thang a, damdawi tha tak tak kan lo nei ta te hi a lawmawm takzet a, a hmuu chhuahna (diagnosis) pawh khawwel huapa khawlchangkang pawh kan lo nei ta. Heng changkanna te hi i hmang tangkai ang u. Damdawi tha awm reng chung si hian TB natna vang hian engvangin nege kan la thih fo ang?

ROBAWM

Daktawr damna damdawi

(Hriselna leh tihdamna – Pathian thu atanga thlirna)

Rev. Rosiam Iiana Tochhawng
Associate Prof. ATC

Dam leh hrisel hi a hlu, lawm a tul e tih hla kan sak thi in ang hian dam leh hrisel a lo va hlu em! Psychologist ropui Sigmund Freud-a khan mihringte nun khalhtu ber chu hlimna zawnna (will to pleasure) niin a sawi a. Mahse, damloh leh hrisel lo chuan hlim hi a har khawp mai. Freud-an Vienna School of Psychology-a a kaihruai Alfred Adler-a khan mihring hi chutiang a nuam zawnnain a kaihruai ni loin ‘thuneihna leh thiltihtheihna’ a zawnna (will to power) zawk in a khalh zawk a ni tiin a pu Freud-a rawn hnial a. Juda pa, Neurologist, Juda a nih avanga German ho tihduhdahna rapthlak tak tuar chhuak (Holocaust survivor) ngat Viktor Frankl-a khan Third Viennese School of Psychotherapy rawn din chhuakin ani kha chuan a hmaa, Freud-a leh Adler-a tengaihdan ang lo takin mihring kan zawn ber chu ‘a awmze hriat’ hi a lo ni tiin a lehkhabu ‘Man’s Search for Meaning’ chuan khawtlang mite a hneh hle a nih kha. Ani kha chuan tuarna te pawh hi a awmzia kan hriat rual rual in tuama a ni longhal a ti (Suffering ceases to be suffering the moment it finds a meaning). A eng pawh chu ni se, nawmna emaw, thiltihtheihna emaw, nun awmze hriat emaw pawh chu damna leh hriselna tel lo chuan eng teh ual a ni lo.

Chuvang chu a ni mahna, nun hi eng nge a awmzia (what is the meaning of life?) tih zawt hmasatu pawl nia an sawi philosopher Arthur Schopenhauer-a khan mihring zawng zawng leh thil nung zawng zawng thununtu chu ‘nun duhna emaw ‘dam duhna’ (will to live) niin a hria a, dam khawchhuah duhin thil nung zawng zawng kan inelin kan indo a, chu chuan

hrehawm tinreng a siam a, chuvangin ‘tuar turin’ kan awm a ni ber mai. Tuarna tihreh dan chu nun duhna tihbo emaw tihtawp niin a ngai . Mahse, nun duhna (will to live) chuan mihring leh nung dang zawng zawng thunun vek si. Tichuan, dam tum reng reng a nung, thih hlaua nung kan ni tihna a ni a, chutiang laka min chhan thei chu kan mamawh ngawih ngawih a ni.

Damna leh hriselna chu mihring nun thununtu, nung tinreng nun khalhtu a ni a, chuvangin hnam tin hian hrisel leh dam hi a hlu tih hria in hriselna leh dam tum dan kan nei vek. Kan Mizo pi leh pute pawh khan hrisel duhin hmun hriselah khua din an tum hram hram a, chuvangin thosi tamna tlansanin tlangchhipah, tiauchhum chim phak lohah an awm a, luik am zawl tha te kha lo bel ta se sikserhin an thi nasa viau zawkin a rinawm. An thiam ang tawkin hmun hrisel kha an zawng a ni. Dam lohna leh thihna kha chhan lian pui pui pathumah an then phawk niin a hriat a; an natna tamber kha ramhuai hnathawhah an puh a, chumi tihdamna tur

chuan intawai a ngai thin, intawina hlantu chu puithiam a ni. Tawhsual tawh (accident) chi hrang hrang, sa seh te, thing leh tuia tlak, ral laka hliam tuar leh thih te leh chhiatna hrang hrang inven lawk ngaihna awm lutuk lo a awm bawk a. Chung laka an him theih chuan khal an hmang thin, hei hi chu puithiam ni loin sadawtin a hmang thin a, natna leh chhiatna laka invenna a ni ber awm e. A pathumna chu dawi a ni. Thawnthuah dawi chungchang kan hmu nual ; Lalruanga chu dawithiam a ni a, a aia dawi thiam Zangkakin a dawi hlm, Zawlpala chuan Phuntiha dawi phul ba rawh a ei a, a thi.
